

May 2024

Dear Valued Customers,

We are thrilled to announce a significant enhancement to our flagship TriggerGrip™ Dispensing Tool - the introduction of the new TriggerGrip™ Adapter! At MicroCare, we are committed to continuously improving our products to better serve your needs, and we believe this upgrade will greatly enhance the functionality and ease of use of our TriggerGrip™ system.

The newly designed TriggerGrip™ Adapter provides easier, more secure connectivity for your MicroCare™ TriggerGrip™ PCB cleaning tool. It allows for effortless attachment to most MicroCare aerosol cans, streamlining the installation process and ensuring a reliable connection. Additionally, the adapter features a convenient on/off switch, giving you complete control over the flow of solvent to the handpiece.

As a token of appreciation for your continued support, we will be providing these adapters to existing customers at no cost. Moving forward, all new orders for the TriggerGrip™ Dispensing Tool (MDD-ESD) will include the adapter as part of the package.

In conjunction with this upgrade, please note that MicroCare aerosol products will no longer be manufactured with the two holes drilled into the top of the shroud which had previously allowed the Trigger Grip™ to connect. You will begin to see our updated aerosol shrouds in product shipments starting now.

Your satisfaction is our top priority, and our team is here to assist you with any questions or concerns you may have regarding this exciting update. For more information, please scan the QR code below.

We look forward to providing you with an even better user experience with our TriggerGrip™ system.

Best Regards,

Scott Wells  
Managing Director
