

## Enhanced PCB Protection

### Features and Benefits

- Clear, thin, flexible, and durable
- Protects against dust, humidity, salt spray, corrosion, and chemical fogs
- Protects against electrical arcing, shorts, static discharges, and thermal shocks
- Contains a UV indicator for optical inspection
- Applied by brushing, dipping, manual and selective spraying
- Available in liquid, aerosol, and pen
- IPC and UL certified versions

### Applications

- Improves reliability, and lengthens the life of electronic circuitry
- Protects circuitry in coastal, tropical, marine, and other humid environments
- Allows electronic devices to operate in harsh environments
- Allows traces to be placed closer together by preventing arcing

**Acrylic** - One-part conformal coating which is cost-effective, and easily reworkable.

**419D** – Certified to IPC-CC-830B and UL94 V-0

**419E** – Certified to IPC-CC-830C and UL746E

**Silicone-Modified Acrylic** - One-part conformal coating that is both soft and flexible, and provides a wide service temperature range.

**422B** – Certified to UL94 V-0

**422C** – Certified to UL94 V-0

**Polyurethane** - One-part conformal coating that provides strong protection against solvents, and corrosive gases.

**4223F** – Certified to IPC-CC-830B and UL746E

**Epoxy** - Two-part conformal coating that is flexible, and provides strong protection against chemicals.

**4225** – Certified to IPC-CC-830C

**UV Curable** - One-part UV curable conformal coating suitable for high-throughput applications.

**4200UV** – Certified to IPC-CC-830C and UL746E
